

I think the definition of a climate change is when the weather changes like: Winter to spring and spring to summer and summer to autumn.

As from today to 200 years ago the climate has change a lot. Recently, the world has gotten hotter. Last year, in 2022 there was a heatwave. It was so hot that some of the land was dried up! Climate change is when the climate which is like weather but when it changes without warning or anything it can be dangerous!

Last time, in 2021 it was so cold that it started to snow a lot, but then in 2022 as I have said there was a heatwave and so much of the land was so dried up. The days are now getting hotter so this means that this will effect our weather. We as humans breathe out carbon dioxide and take in oxygen but trees breathe in carbon dioxide and breathe out oxygen. We have worked on this topic a lot so we know a little lot and what we have learned is about this subject. We even saw the graphs how the world has changed and surprisingly it's getting hotter.

I thought it would get cooler because nowadays, it is getting cooler! A weather is not the same as a climate change. The difference from a climate change and weather is that a weather is like: rain, snow, hail snow and climate change is different. Climate change happens so suddenly that imagine you are outside playing with your friends and it was a sunny day, suddenly, you get caught in a storm then you get wet that's what climate change is. Something like that. So south bank we really need your help.

South bank we really need your support for the problem of the climate change. Climate change is one the most serious problems for the earth. So now that you guys have extra money please help us from the climate change. A Green house is very helpful if it's hot. The sunlight goes through the Green house so it's normally used for plants. There are lots of bees but we are not going to talk about that though so back to climate change it's very deadly! Our air is getting polluted because of all the gas which is flowing in the air so it's likely to change the climate change. We need your help south bank and we really need it fast! So have you made your decision? Please say Yes!

“ We need you to help us with the climate change I know I said that same thing millions of times but I just need to say it. The people in other islands are going to suffer or die because of the climate change so we need your extra money to help change the climate change. Climate change is now causing problem to the weather now so now if you want the people to live in a good environment... To live in a safe environment, or to live in a better environment, this is the time to change it all and save the Peoples life on the earth. So please help the Earth, the people, the animals so now this time please just go for it please!

One of the the things you guys could use is a greenhouse. If you don't know what a greenhouse is it basically is where you store plants in it. It's transparent so why do we use a greenhouse to store plants? well, its because in a Greenhouse you can trap the heat in it so basically you help the climate change and help your plants grow to, so please use a greenhouse it helps.

If you also use a greenhouse it will block the heat from the sun but like not all of it but some of it if it is burning hot! We need to use less gas it affects our air to breathe in so we prefer you to stop using the cars we are using now and start using electric cars. Please also stop using so much electric. We could also put solar panels on our roofs so we don't waste electric. The people in the islands which are surrounded with ocean need our help. There homes will be destroyed and even the animals homes. They'll will die as well! So please use your extra money to help change the climate change. Please! South bank use your money for climate change.
